

# Data Science Foundation

## Lesson #7 - Storytelling from data visualization I

Ivanovitch Silva  
September, 2017

# Agenda

---

- Case study: visualizing gender gap
- Data Ink Ratio
- Hiding tick marks, spines
- Color, layout, line width
- Legend and annotations

# Update the repository

---

```
git clone https://github.com/ivanovitchm/EEC2006.git
```

Or ....

```
git pull
```

# Motivation

---

Year	Agriculture	Architecture	Art and Performance	Biology	Business	Communications and Journalism	Computer Science	Education	Engineering
1970	4.229798	11.921005	59.7	29.088363	9.064439	35.3	13.6	74.535328	0.8
1971	5.452797	12.003106	59.9	29.394403	9.503187	35.5	13.6	74.149204	1.0
1972	7.420710	13.214594	60.4	29.810221	10.558962	36.6	14.9	73.554520	1.2

The [Department of Education Statistics](#) releases a data set annually containing the percentage of bachelor's degrees granted to women from 1970 to 2012.

# Improving Plot Aesthetics

---

# Visualizing the gender gap

---

- Biology degrees increased steadily from 1970 and peaked in the early 2000's.
- It only tells half the story.

# Visualizing the gender gap

---

```
import matplotlib.pyplot as plt

plt.plot(women_degrees['Year'],
         women_degrees['Biology'], c='blue', label='Women')
plt.plot(women_degrees['Year'],
         100-women_degrees['Biology'], c='green', label='Men')
plt.legend(loc='upper right')
plt.title('Percentage of Biology Degrees Awarded By Gender')
plt.show()
```

# Visualizing the gender gap

---

```
%matplotlib inline
women_degrees['men_bio'] = 100-women_degrees['Biology']
women_degrees.plot(kind='line',x='Year',y=['Biology','men_bio'],
                    title='Percentage of Biology Degrees Awarded By Gender',
                    color=['blue','green']).\
                    legend(loc='best',
                           labels=['Women','Men'])
```

```
ax = women_degrees.plot(kind='line',x='Year',y=['Biology','men_bio'],
                        title='Percentage of Biology Degrees Awarded By Gender',
                        color=['blue','green'])
ax.legend(loc='best',labels=['Women','Men'])
```

# Data Ink Ratio

---

**Remove**  
to improve  
(the **data-ink** ratio)

# Hiding tick marks

```
ax.tick_params(bottom="off", top="off", left="off", right="off")
```

# Hiding spines

```
ax.spines["right"].set_visible(False)  
ax.spines["left"].set_visible(False)  
ax.spines["bottom"].set_visible(False)  
ax.spines["top"].set_visible(False)
```

# Comparing gender gap across degree categories

Storytelling.l.ipynb

# Color

---

# Setting line color using RGB

---

	0.107.164		200.82.0
	255.128.14		137.137.137
	171.171.171		162.200.236
	89.89.89		255.188.121
	95.158.209		207.207.207

```
cb_dark_blue = (0/255,107/255,164/255)
```

```
women_degrees.plot(kind='line',x='Year',y='Biology', color=cb_dark_blue)
```

# Setting line width

---

```
women_degrees.plot(kind='line',x='Year',y='Biology', linewidth=2)
```

# Improve the layout and ordering

# Replace the legend with annotations

```
ax.text(1970, 0, "starting point")
```
